

Welcome Visitor...

Aquathin's Mission is to be the premier and most recognizable water treatment company in the Universe. To improve the quality of Life, by providing the service of better water through supreme state of the art and trend-setting systems and technologies...while having fun along the way.

Bold Precision and Precision Bold is our vogue...we've accomplished what others said not possible...which turned out to mean not possible for them. We are proud to earn our price because most others do not have the discipline, integrity, education, charisma and resources to duplicate what we have accomplished here and in the field. No other company has acquired more honors, achievements, accomplishments in this industry...and that's important in your decision making process.

Prepare to have your socks knocked off !

Thank you considering Aquathin and its Dealer Network to provide your family or business the very best in water security.

***FOR THE BEST TASTE IN LIFE &
25 Years Pure Excellence
Think Aquathin...AquathinK !!***

Attn: Alfred J. Lipshulz, Pres.

Dear Sir,

For the Past 4 years I have been working in the Ukraine, living in Kiev the capital. When I first came to the Ukraine someone gave me a small water purifier which I did not trust and used very little. Later on I was given a Swiss made Katydyn which I used for about 2 years.

On March 8, 1995 thieves broke into my flat, stealing almost everything of value. One of the items taken was my Katydyn. It was about one and a half weeks before I returned to America so I was able to get by.

When I returned home I was told about your product by Don Auburthnot, your Aquathin dealer of Polk County. I made the decision to buy your RO-DI Traveler with a pump, as my flat is on the 12th floor.

I would like to report to you that I am very, very pleased with your product. I had to pump 572 times with the Katydyn to get 3 liters of water. I would dread to start each time I needed water. NOW THANKS TO YOU, ALL I HAVE TO DO IS CONNECT TO THE WATER FAUCET, PLUG IN THE PUMP, AND IN A FEW MINUTES I HAVE A GALLON OF PURE WATER.

Thank you for your contribution of an AMERICAN MADE product that helps bring PURE water to the rest of the world that are without good water.

Very Sincerely,

home address:

To Whom It May Concern:

FilmTec Corporation has had a long relationship as the supplier of reverse osmosis membrane elements to the Aquathin Corporation. Product innovations, patented improvements in equipment, and their Aquathin University for properly training individuals on membrane technology and service establishes them as a leader in the water treatment industry. Aquathin Corporation makes high quality personal and commercial water distribution systems that we are proud to be a part of with our membrane products.

Respectively,

WORLD TRADE CENTER FORT LAUDERDALE

December 1, 1997

TO WHOM IT MAY CONCERN

This is to certify that representatives of World Trade Center Fort Lauderdale have visited with Alfred Lipshultz, President of Aquathin Corporation, located at 950 South Andrews Avenue, Pompano Beach, Florida 33069, U.S.A.

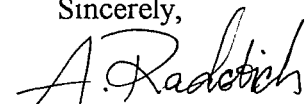

Aquathin is privately owned corporation and has been in business since 1980. The company offers a complete line of reverse osmosis water filtration systems for commercial, residential and laboratory markets.

We find Aquathin to be a well-managed company with excellent quality control and commitment to supplying the export market. In 1992 the company was awarded the highest United States recognition for exporting, the President's E Award. Aquathin has distributors in 34 countries and holds numerous patents for reverse osmosis water filters.

We recommend Aquathin as a committed exporter, reputable supplier and a business partner to any foreign distributor, agent and importer interested in quality American water filtration equipment.

Should you have further questions about Aquathin or their products, please do not hesitate to contact either Pablo de la Llama or Alex Radetich.

Sincerely,

Alex Radetich

Pompano Beach, Florida 33069

Dear Mr. Lipshultz:

Thank you for renewing your membership in the Florida Agricultural Promotional Campaign, commonly referred to as "*Fresh from Florida*." Support such as yours, will enable us to continue promotions to increase consumer awareness of Florida agriculture and expand domestic and international markets for our state's many products. Promotional activities planned for next year will make our tenth year an exciting one. Plans include industry promotions, trade events, incentive programs, a full color promotional magazine entitled "*Fresh from Florida*" and much more. Your annual membership certificate recognizing you as one of the sponsors of the Florida Agricultural Promotional Campaign is enclosed.

This year holds a great deal of promise for the "*Fresh from Florida*" Campaign. It is vital that we continue to seek support from the Florida Legislature for this important program. Please write or call your legislators and voice your support for the "*Fresh from Florida*" promotional program.

Your involvement in this partnership is very much appreciated. I am confident that this campaign will continue to have a positive impact on your company as well as Florida's entire agricultural industry.

Sincerely,

Dear Alfie:

As I prepare my annual preventive maintenance bid for the USCG at Elizabeth City Air Station, I want to take time to thank you for the trouble free 100+24K RO System that I service.

As you recall I installed two 100+24K RO Systems in Sept. '94 at the USCG Air Station, so they could wash their C-130 aircraft to lower their corrosion problems. Their TDS level at the Air Station is 600 PPM your system has consistently preformed trouble free reducing the TDS below 50PPM. For the past five years all I've had to do is change filters. The USCG is happy with the systems and has plans to install the same systems to wash their helicopters. Again thank you for the Maintenance free system.

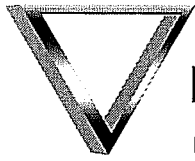

Sincerely

Dear Alfred,

I want to personally let you know how impressed I am with Aquathin equipment. I have seen many water processing products all over the world, and I have personally evaluated many of them at Detectra Laboratories. After a careful evaluation (including testing) of many manufacturers RO packages, I chose Aquathins' model "100+24K" to make calibration reference samples for Detectra equipment. I have even purchased two "Aqualites" for my personal home and office for drinking water. Need I say more?

Keep up the good work!

SINCERELY,

JOHN SARGENT

Dear Mr. Lipshultz

We have been selling the Aquatin equipment into the printing industry for about two years now and I am very pleased to say that all of the Aquathin units we have installed have been totally trouble free. The instillation of the units from the AK-40 to the 1200+24K and all combinations in-between has been a simple and straightforward procedure.

Aquathin's technical assistance with system configuration of special projects along with Aquathin University has been invaluable to Allied and our customers. I would also like to thank you for the back up we receive from Aquathin with rapid turnaround of our orders when necessary.

Sincerely,

Jeffrey H. Rose

RE: Muck Sucker Filter

Dear Mr. Sure:

Recently I called your office regarding one of our customer's recirculator that was not being maintained as it should, due to a heavy workload. You sent me the above filter to try to correct this problem.

Approximately two hours after installation, their recirculator water began to clear up and three and one-half months later as I write this letter, it is still working superbly. This filter is the most amazing discovery we have seen in the industry.

To begin with, we tried many different types of filters. Some clogged in two days others lasted two weeks. Their problem was so bad, they were poking holes in the filter as it clogged leaving it in-place.

As we began to investigate an answer to their problem, we found your company. With your help we discovered the amazing Muck Sucker. The customer and I both wish to express our appreciation for the introduction, and we will encourage each shop to try this amazing filter and see the results it produces. Thank you again for your help.

Sincerely,

Dennis Spaeth

SUBJECT : AQUATHIN WATER PURIFICATION SYSTEMS

It is now approximately 3 years since Aquathin has been the only water purification system that we allow our patients to use. This was, of course, after going through numerous other brand names, every time only to be, yet again, disappointed about the lack of absolute purity of the water being produced.

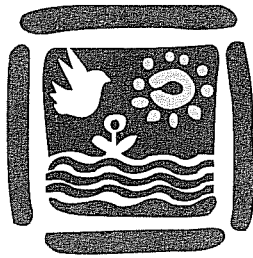

Life Science patients, or even people who just live according to the Life Science healthy life style, are extremely fussy about water purifiers because they have been thoroughly educated regarding the connection between pure water intake and health. They are very well aware of the fact that enough research has already been done to prove just how dangerous unpurified water is to their health. Many diseases and ailments have now clearly been linked to toxicity in water.

I personally, living on pure (raw) foods only and believing in healing solely via pure water fasts, will not touch any other water than that which has gone through an Aquathin purifier. I practise what I preach!

However, it is not only the purity and taste of the water from Aquathin which I can confidently call the best. Very definitely, the quality of the actual units themselves have by far outstripped any of the others we have tried. With that also comes the incredible service and attention from the Aquathin Consultant. One is not forgotten after your purchase.

SUBJECT : AQUATHIN IN SOUTH AFRICA

Gordon Bastiaans and Aquathin Water Purification Systems have one thing in common: they are both the best when it comes to which water you should allow into your body.

Gordon knows his subject extremely well and can answer any questions you may have. However good the Aquathin product is - and we at Life Science testify to that - I think people wouldn't be half as interested if it was not for Gordon's willingness to assist and pleasant manner in which he deals with people. It is especially that post-purchase assistance and interest which makes such a difference.

Gordon is certainly the only Water Consultant I would recommend to anyone.

Mr. Alfred Lipshultz
AQUATHIN CORP.
Aquathin Business Centre
950 South Andrews Avenue
Pompano Beach, FL 33069

Dear Mr. Lipshultz,

I was delighted to locate your web site and to place my order with you for the Platinum 90 under-the-counter water system. Now I can ensure that my family will have the purest water available, even though I live approximately 1200 miles away from you! I look forward to receiving my new system at your earliest convenience.

As I mentioned when I telephoned in my order, I have used this system in England for the past four years. Prior to that, we drank Aquathin bottled water for two years. During that time, I have become a believer that 'we are what we ingest!' I have an autistic son and two daughters who have been very healthy over the past six years. I don't believe that the Aquathin purified water is a cure for autism, but I do think if we keep our bodies healthy, then we can focus more energy on overcoming our disabilities/difficulties in life. Matthew is now mainstreamed in the 5th grade, and last term he received five A's and one B! Helping my children to study, learn and grow is where I prefer to spend my time.

We use the Aquathin water for drinking, preparing/washing foods, and for cooking. I can't speak highly enough of it, and I strongly recommend that everyone who cares about their health use the Aquathin method of water purification.

Sincerely,

Cindi Celske

**NEW
INSERTS**

Reed A. Kress, D.C.

As a chiropractic physician, I look to give my patients the highest quality products to increase their vitality and health. Water, being an important component in proper health maintenance, should be as clean and pure as possible. The Aquathin filtration system gives your body exactly that, pure H₂O. This is why I recommend it to my patients.

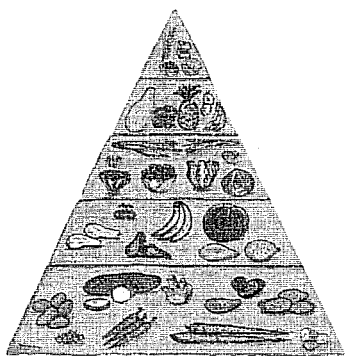

In the last century, mankind has increased the amounts of toxins into the environment in which we live. These toxins are found everywhere, including in our water. The city filtration systems, although adequate for providing consumable water, fall short of removing all pollutants. What does this problem of increased pollutants mean for us individually? It may present a threat to the vibrant health we would like to enjoy by constantly stressing our natural filtration system, the kidneys and liver. Also, over time, consistent exposure to pollutants can lead to disease and sickness. With that said, we need to take personal responsibility and take those pollutants out of the water. This can be accomplished through an Aquathin purification system.

I base my recommendations, whether vitamins, exercise programs, chiropractic, or water, on data and peer reviewed research and literature. I can say I have researched this product and have found that Aquathin does provide a very quality filtration system that eliminates unnecessary pollutants and toxins from the water.

It is my belief that everyone should take personal responsibility when it comes to health. Consuming 60 to 70 ounces of pure water everyday is one piece of the health puzzle. So if you are going to provide your body with the right amounts of water, why not choose to provide it with the highest quality water.

Yours in Health,

Reed A. Kress, D.C.

Dear Mr. LIPSHULTZ:

For many years I used and recommended purified water for my family and patients, because it is necessary to conserve and obtain good health.

In 1992, I purchased from AQUATHIN Puerto Rico two systems which are the Platinum 90 with Reverse Osmosis and Deionization which have given me wonderful results. I also purchased other systems for my family.

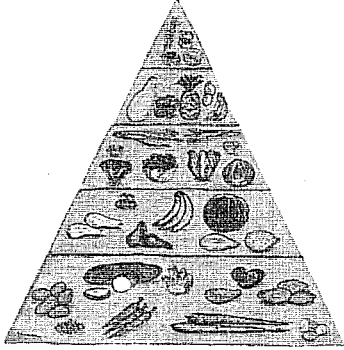

I immediately recommended AQUATHIN systems to my patients, hundreds of them have purchased AQUATHIN systems, and they are thankful and satisfied with them.

At all our Restaurants, "All Natural Plaza", we have installed systems of 400 gallons including softeners, giving an exquisite taste to the food, ice, and others.

For all these reasons I recommend with great security and confidence AQUATHIN systems to all those who desire the purest and delicious water of the world, most of all those who want to protect their health.

Sincerely,

Norman Gonzalez Chacon N.D.

Pompano Beach, FL 33069

Estimado Sr. Lipshultz:

Durante muchos años había usado y recomendado agua destilada a toda mi familia y a mis pacientes, ya que es necesaria para una buena salud.

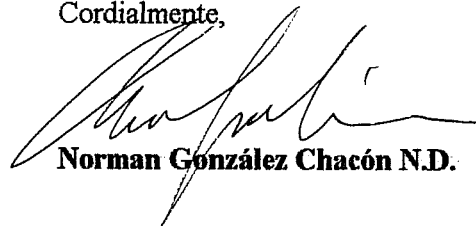

En el 1992 adquirí de Aquathin de Puerto Rico dos sistemas Platinum 90 de Osmosis Revertida y Deionización los cuales me han dado un resultado maravilloso. Luego adquirí otros para la familia.

Inmediatamente comencé a recomendar los sistemas Aquathin a mis pacientes y cientos de ellos han adquirido Aquathin y todos están agradecidos y satisfechos con el sistema.

En nuestros restaurantes "All Natural Plaza" se han instalado unidades de 400 galones por día, incluyendo los suavizadores, dando un sabor exquisito a las comidas, cubitos de hielo y otros beneficios.

Por esta y otras razones yo recomiendo con gran seguridad y confianza los sistemas Aquathin a todos aquellos que desean el agua mas pura y deliciosa del mundo y sobre todo, a los que interesan proteger su salud.

Dear Mr. Hall,

Since installing the Aquathin sterilized water system you designed for A.E.M.C., our Amsco sterilizer has been performing beautifully. The Aquathin purifier has consistently produced 1 Megohm, bacteria-free water in a reliable manner. There has been no spotting or corrosion of our surgical instruments and no viable bacteria detected. I especially appreciated the redundancy, ease of deionizer servicing, the self-cleaning features, and the fact that we can run our sterilization unit 24 hours a day with no down time.

I would highly recommend your expertise and Aquathin's engineered reliability to anyone needing hospital or laboratory grade equipment.

Sincerely,

Edward Temme

Dear Troy,

The purpose of this letter is to inform you of my company's satisfaction with the commercial Aquathin 1200+24K gpd Reverse Osmosis system installed July of this year. The system, as you are aware, provides purified water to the Omax high pressure water jet cutting machine.

The 1200+24K has operated flawlessly. We appreciate the customized remote reset button that you were able to provide. More so, we appreciate that there are no horns, buzzers, whistles, dials or gages that require monitoring. The system is as simple as plug and go.

I would be pleased to recommend your products and services to any industry requiring systems that provide pure water, with little or no maintenance.

Again our Thanks and warmest regards,

Charlie Coughlin, President
Industrial Tool & Die Corporation

CORPORATE REPORT

Aquathin wins President's Award

Aquathin Corp., the Fort Lauderdale-based manufacturer of water purification systems, has received the President's "E" Award for Excellence in Exporting from the U.S. Department of Commerce.

The coveted award is given to 50 companies nationwide annually in recognition of outstanding export performance.

Export sales grew from 21 percent of Aquathin's gross sales in 1988 to nearly 60 percent in 1989. The 10-year-old company sells water purification systems through more than 525 distributors worldwide.

AWARD-WINNING EXPORTERS

This column is one in a series of weekly profiles of companies that have been honored by the U.S. Commerce Department for excellence in exporting. Earlier this year, President Bush presented chief executives from a dozen of these companies with Commerce's "E" or "E Star" awards at the White House.

The "E" Award was introduced in December 1961 as a revival and adaptation of the World War II "E" pennants given to industrial plants for superior production. The "E Star" award was authorized by the U.S. secretary of commerce in 1969 to recognize continued export promotion efforts by "E" Award recipients.

Aquathin Corp.

Date of award:

"E" Award in 1990.

Why the award was given:

Aquathin Corp. received the "E" Award for its performance in exporting its water purification systems worldwide since 1984. In the last two years, the family-owned company's exports accounted for up to 65% of its total sales. Company executives declined to discuss specific sales and export figures.

Company Data:

Chief executive:
Alfred Lipshultz, president.

Headquarters: Fort Lauderdale, Fla.

Employees and plants: Aquathin currently employs 16 people in all of the company's departments at Fort Lauderdale. In response to continuing growth, the company recently moved into a 60,000 square foot facility known as the Aquathin Business Center.

Aquathin's new headquarters include manufacturing and assembly facilities, sales, shipping, corporate offices and distributor education center known as the Aquathin University. The company takes up one third of the entire facility and rents out the rest.

Basic business: Aquathin designs and manufactures purification systems to produce water "free of salt, heavy metals, water borne disease-causing micro-organisms, industrial pollutants and pesticides," the company claims.

Aquathin offers a variety of patented reverse osmosis and deionization (RO/DI) products developed to purify common tap, well and brackish water for residential, commercial and industrial use. These products include the portable new Kitchentop model and the patented "Platinum 90," a compact system combining Aquathin's patented RO/DI process, a granular activated carbon filter, the patented Elec-

tronic Memory Panel for automatic maintenance, and the patented "Cairfreegap" faucet. The company also manufactures trademarked softeners, charcoal filters, iron filters and lead removal systems.

Reason for Exporting:

Aquathin was established in 1980 in the wake of concern over the quality of drinking water in the United States. As that concern spread worldwide, so did opportunities for the company's products in foreign markets. Initial attempts to enter the world markets via U.S.-based import/export agents were so unsuccessful that the company dropped its export program altogether, according to Aquathin's president, Alfred Lipshultz. "I put my blinders on with total disregard for anything having to do with export," said Mr. Lipshultz. "Our goal was to develop a foothold in our backyard."

Interest in exports was rekindled in 1984 when Mr. Lipshultz participated in a seminar on exporting. "What a breath of fresh air," reflected Mr. Lipshultz, who, at the seminar, learned of the U.S. Department of Commerce's "diligent effort to reduce the U.S. trade deficit through promoting quality U.S. companies."

Export Success:

Subsequent participation in the various export programs sponsored by Commerce helped Aquathin expand its domestic as well as overseas markets. Both grew tremendously. The increase in exports, which accounted for about 60% in 1991, accompanied growth in domestic sales, Mr. Lipshultz said.

Commerce's led to contacts for a network of distributors that Aquathin needed to venture into foreign markets. For instance, Aquathin became a part of the computer information system at all U.S. embassies for a source of water treatment equipment of interest to potential foreign agents and distributors. Commerce's trade missions also helped the company meet local government and business leaders in foreign markets.

Distributors have contributed tremendously to the success of Aquathin. Aquathin invites them to fly to Fort Lauderdale at the company's expense to take part in a three-day training program at Aquathin University, the corporate training center. The distributors receive one-on-one attention and "become involved in the production, sales and the education of our philosophy," Mr. Lipshultz said.

Today, Aquathin sells its systems through 525

distributors, most of whom are located inside the United States. Aquathin has one or two distributors in each of its overseas markets.

"We want to maintain loyal family members," he said. Each distributor maintains direct contact with the corporate headquarters.

Acknowledging that the arrangement of having two agents a country at most might not encourage competitiveness, he said "we do not want our distributors to undercut one another, either."

Markets:

Aquathin's overseas markets include Canada, Latin America, Europe and the Far East. The company has put on hold a plan to set up a shop in Ireland to better serve its European customers because of a lack of unification of regulatory framework and other market conditions, Mr. Lipshultz said.

Meanwhile, orders from Latin America have risen sharply, he said. "Latin America is going to be the No. 1 market for us in 1992," he said.

Transportation:

Aquathin used both air and ocean freight to ship its products.

The Aquathin Corp. Story:

When Aquathin Corp. was established in March 1980, it sought to supply its system (only one specific unit type at the time) to a group of physicians who were interested in providing services to patients seeking "guidance for problems of obesity and/or enhanced longevity."

Soon, the company ran into immense problems from "inept marketing to manufacturing," failure of some physicians to honor their agreement with the company, and lack of aggressiveness on the part of a partner.

Sales in the second year plummeted to \$39,000 from \$74,000 in the first year of founding.

Realizing the company would fail if something drastic was not done, Mr. Lipshultz, then vice president, and his father Mitchell Lipshultz, bought out the partner and cut ties with its marketer. The company became family-owned.

The younger Mr. Lipshultz redesigned the equipment and began advertising in trade journals. Domestic sales subsequently began to grow and a network of domestic distributors came into being.

PACESSETTERS

By LARRY BIRGER
Business Monday Editor

BY far the largest single segment of Dade and Broward's economy are small businesses. Their breadth and diversity are on display this week in the fourth annual Pacesetter awards program, sponsored by The Miami Herald.

Winning companies run the gamut from high-tech businesses in the water purification and software fields to mom-and-pop office supply companies and barbecue-sauce makers.

AQUATHIN CORP.

Growing sales for a basic product

Back to basics: Aquathin Corp. wants water to be just that, plain H₂O.

The Pompano Beach-based company, founded in 1980, manufactures and distributes purification systems that free water of salt, minerals and pollutants. Its best sellers are residential drinking systems that cost between \$450 and \$900. The company also targets offices and businesses. It offers 58 systems at prices ranging from \$49 to \$40,000.

President Alfred Lipshultz would not disclose the company's sales figures. But he said sales have grown by about 20 percent a year since it started until 1990. Recessionary trends last year slowed the company's growth to about 13 percent, he said.

Lipshultz

Lipshultz said Aquathin built its clientele through word-of-mouth recommendations. The company gradually developed an international network of 500 distributors. The company recruits them by placing ads in trade publications and trains them in three days.

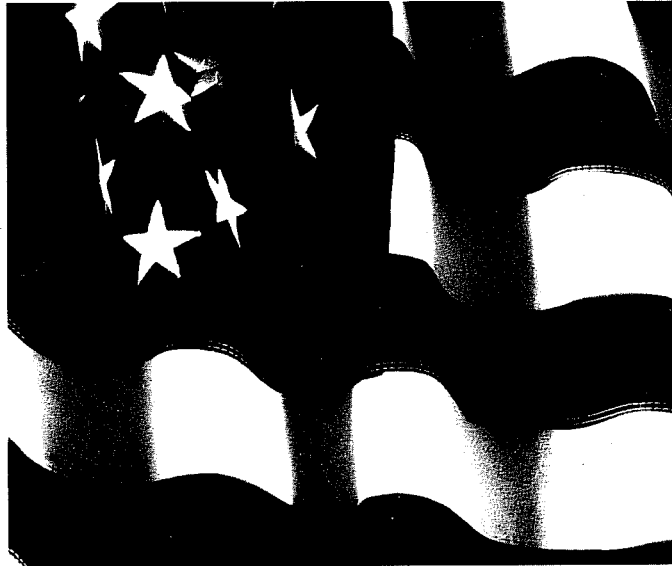

Systems are now sold in the United States, Canada, Europe, Africa, Latin America and the Caribbean. Lipshultz said increasing concerns over the quality of drinking water will continue to open new areas for Aquathin.

BERENICE D. CHAUVET

For small business to compete today, it takes initiative. Blue Chip Enterprise Initiative

Small business is the engine that drives the American economy.

Today our nation's small businesses are America's new Blue Chip companies, creating jobs and providing the innovation our nation needs to compete.

More important, they inspire others.

They have been willing to share their experience, successes, even their mistakes. They believe, as we do, that all of America will benefit from this exchange.

Connecticut Mutual Life Insurance Company, the U.S. Chamber of Commerce, and Nation's Business salute the companies that participated in The Blue Chip Enterprise Initiative, now in its third year.

Their Blue Chip Enterprise Award applications tell compelling stories of challenge and commitment, of overcoming adversity and emerging stronger. And we congratulate **Aquathin**, honored this year as a National Blue Chip Enterprise, for their exceptional resourcefulness, resilience and determination.

For this is no mere awards program. With the support of 200 volunteer judges and hundreds of participating Chambers of Commerce, the Blue Chip Enterprise Initiative is an ongoing effort to extend the quality and competitiveness of American business, by sharing the insights gained through the award search with chamber members throughout the year.

We salute **Aquathin**.

Their initiative is America's inspiration.

October 8, 2002

The City of Columbiana WWTP had the Aquathin High Flow Platinum-90 Patented Reverse Osmosis/Deionization Purification System installed in April of 2000. The quality of water that the system produces is well beyond that required in the municipal wastewater laboratory industry.

John Fimognari, our SDG service representative provides annual maintenance services on the system and has always been prompt, informed, and diligent in achieving the best quality of water for our laboratory.

I have been very pleased with the system and the service provided by SDG Wellness Institute and John.

Best regards,
Karen DeHoff
City of Columbiana WWTP Laboratory

Aquathin receives a patent for water-purifying device

AQUATHIN Corp., the Fort Lauderdale-based manufacturer of water purification systems, has received a patent for an electronic memory panel, a feature that prolongs life and efficiency of a reverse-osmosis element.

The electronic memory panel allows a reverse-osmosis system to manufacture purified water, then shut down and depressurize. This is expected to reduce maintenance and increase the efficiency and longevity of the reverse-osmosis element.

The 10-year-old company designs and manufactures 57 different water-purification systems for commercial and residential use. The company also holds the patent for the only reverse osmosis/deionization purification system on the market, producing water free of salts, heavy metals and chemical pollutants.

In April, Aquathin received the President's "E" Award from the U.S. Department of Commerce for excellence in exporting.

BUSINESS EXTRA**U.S. honors four S. Florida firms for exports**

By CHARLES LUNAN
Business writer

Four South Florida manufacturers are being recognized for their contributions to improving the nation's balance of trade.

At a ceremony at the Inter-Continental Hotel in Miami on Friday, officials from the U.S. Department of Commerce will bestow their "E" award to personal computing firms Boca Research and Core International of Boca Raton, Gribetz International in Sunrise, which manufactures machinery used to make quilting for mattresses, and Aquathin in Fort Lauderdale, which makes reverse osmosis water treat-

ment equipment, also will be honored.

They were the only Florida companies given the honor this year, said Ivan Cosimi, director of the U.S. Department of Commerce's Miami district office.

The "E," or export, award is designed to recognize companies for success in exporting. Since its inception 29 years ago, the award has been given to 74 Florida companies.

Five-year-old Boca Research designs and manufactures printed circuit boards that can be plugged into IBM compatible personal computers to expand the jobs they can do. The private company does not release dollar sales figures, but it has increased its exports from 7 percent of sales in 1987 to 28.7

percent as of February, said Sylvia Fagiani, a spokesman for the company.

The 60-employee firm expanded its advertising in the European edition of *BYTE* magazine last year and has ridden its 100,000 circulation in Europe to higher mail order and distributor sales.

Core International is a premier supplier of high performance disk drives and other mass storage devices for IBM compatible personal computer networks. The company's exports rose from 3 percent of sales in 1985 to 25 percent in 1989, said Theresa Marcous, director of international sales.

Most of the sales were in Europe, Australia and New Zealand, Marcous said.

Aquathin Distributing designs, manufactures and distributes 57 variations of its reverse osmosis water treatment system in mostly industrialized countries in Europe and the Pacific Rim. Exports have grown from 8 percent of sales in 1987 to 59 percent in 1989, said Alfred Lipshultz, president.

Gribetz International, with about 120 employees, manufactures quilting machinery in the Sawgrass International Corporate Park in Sunrise. The company exports its product to 40 countries. International sales increased about 20 percent this year and now make up about 40 percent of the firm's total sales, said Steven Fayne, chief financial officer and general counsel.

Friday, April 27, 1990

The Honorable Robert A. Mosbacher
Secretary of Commerce
U.S. COMMERCE DEPARTMENT
14th & Constitution Avenue N.W.
Washington, D.C. 20230

Re: Your Cable of Congratulations

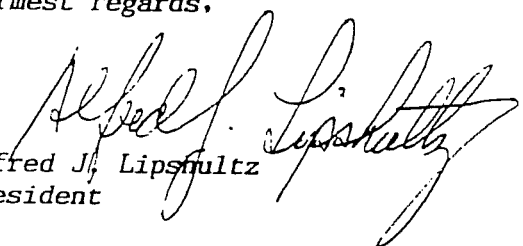

Dear Mr. Mosbacher:

I wish to convey my sincerest thanks from all of us for selecting **AQUATHIN CORPORATION** to receive the President's "E" Award. Our goal is to enhance the quality of life by providing pure water the world over. Further, our three patents, those pending, and corporate philosophy allows Aquathin to achieve that goal while also benefiting the United States balance of trade.

While I drive this company with 16 axioms, the single most important one is, "Thank God for my country, my family and Aquathin". Thank you again for the recognition.

FOR BETTER WATER FOR ALL &

Warmest regards,

Alfred J. Lipskultz
President

AJL/gsc

The Broward World Trade Digest

June/July 1990

Broward Economic Development Board/Broward's Committee of 100, Inc.

Aquathin Corporation Receives President's Exporting Award

Aquathin Corporation, the Fort Lauderdale - based manufacturer of water purification systems, has received the prestigious 1990 Presidential "E" Award for Excellence in Exporting from the United States Department of Commerce.

The coveted award is given to 50 companies nationwide each year in recognition of outstanding export performance. Aquathin is the only South Florida company to receive the award at this time.

The U.S. Presidential "E" Award was adopted in 1961 to honor U.S. companies that demonstrate excellence in exporting. To be considered for the Presidential "E" Award, companies must possess a minimum four-year record of exporting with substantial annual increases in volume.

Aquathin's export sales of water purifying systems made up 21 percent of the company's gross sales in 1988. After a busy 1989, export sales increased to 60 percent of Aquathin's gross.

Aquathin Corporation was formed in 1979 by company president Alfred Lipshultz. The Fort Lauderdale manufacturer employs 13 people at their 2800 W. Cypress Creek Road headquarters. Aquathin distributes its products through a worldwide network of over 500 distribution companies, reaching Japan, Korea, Latin America, Canada, Europe, the Middle East and the Caribbean.

Lipshultz attributes Aquathin's foreign success primarily to referrals generated by an outstanding reputation for high quality treatment systems. He actively pursues new export markets by participating in trade missions and foreign trade shows.

The Broward World Trade Council will host a luncheon on June 29th at Pier 66 Resort and Marina in recognition of Aquathin's Presidential "E" Award.

"Having a company like Aquathin as a member of the World Trade Council is a great asset," said council chairman Albert J. Redlhammer. "Aquathin's accomplishments in receiving the "E" Award should send the message to other Broward County Manufacturers to get involved and explore the vast markets available to exporters," he said.

International Business Seminar Attracts Novice Traders

The Broward World Trade Council hosted a free seminar in late March with over 200 participants. The two-part seminar at Nova University was offered as an introduction to the challenging world of international business.

International business leaders shared their knowledge and expertise with the attentive late night audience. Highlights of the program included a presentation by attorney Ira Zuckerman, Chairman of International Trade Forum (ITF), on the legal issues facing businesses with international markets. Trade Representative Ruby Alonso from the Florida Department of Commerce informed about the programs and services available from the state government. Al Redlhammer, president of Seariders International and chairman of the World Trade Council presented the transportation aspects of international trade, including freight forwarding and customs documentation.

Due to the overwhelming interest from the business community, similar seminars are being planned. The programs will focus on timely international trade issues and will be coordinated by Nova's International Trade and Development Center, the Broward World Trade Council, and other internationally active groups. For further information call Lou Sandora at 524-3113.

If you would like to attend the June 29th luncheon at Pier 66 Resort and Marina in Fort Lauderdale please contact Paula at 524-3127 to reserve a seat by June 22.

FM: Akira Fukushima, Techno-Core, Inc./Aquathin Japan

Dear Alfie-San,

Good Day,

We have received your fax of October 11, 1993 which urgently requesting the letter and its translation of the Master of Enshyu Ryu Tea Ceremony (Enshyu Ryu School) within 48 hours for your bidding in large restaurant. In this connection, we have translated as follows and have also faxed you the original letter from the Master of the Tea Ceremony in Japanese

Enshyu Ryu Tea Ceremony School is one of the big three Tea Ceremony Schools in Japan, and this school has a membership of more than 50,000.

The Recommendation from the Master of Tea Ceremony

The Tea Ceremony had been carefully treating the water to be used for Tea Ceremony since long time. Famous Rikyu and Enshyu, founders of Tea Ceremony in old Japan, had been looking for the water which brought out the true taste of Tea and they had been seeking its water from spring, well-water and natural rivers. They had been taking care of them very much and had been handing down these ways in long history because of the taste of the Tea and it water was very important and big factors for the taste of Tea. Due to acceleration of environmental destruction today, We, Enshyu Tea Ceremony, have been worry about the quality of well and tap water because they are too bad to use for the Tea Ceremony water here in Japan.

When you wish to seek the real Taste of Tea, the pure water, no mixed items in the water, is the best. Since then we have been looking for the pure water which have no impurities in the water. We finally met the water which was produced by the manufacturer of Aquathin Corporation, in U.S.A. The person who is superior to the taste will be able to find the taste of the quality of the water by the drop without doubt.

In order to enjoy and understand the true taste of Enshyu Tea Ceremony, We, Enshyu Tea Ceremony recommend Aquathin Water Purifier to our fellow members for your better in life.

The 12th Master of Enshyu Ryu Tea Ceremony School
Soukei Kobori, Master

Best regards,

アクアシン浄水器

KT-90-2C型

宇宙飛行士用にNASAで開発された逆浸透膜方式浄水器は、有害物質残存値が0(ゼロ)ppmになる唯一の浄水器で、100%純粋な水ができます。

遠州茶道宗家小堀宗慶家元もご自宅のお茶席で、この水を使っておられます。

クラスター(水の分子集団)が小さくなるので、点茶だけでなく飲物や食事が一段と美味しくなり健康生活に最適です。

高さ 27cm・横幅 48cm
奥行 21cm・重さ 6kg
タンク容量 7.5ℓ
浄水量約 72ℓ/日

推薦のことは

茶道では昔から、茶の湯に使う水を大切に扱ってまいりました。利休や遠州は、茶の味を最もよく引き出してくれる湧き水や井戸や自然の河川にその水を求め、それを丁寧に使い、大事に後世に伝えてきました。お茶をたてる水とお茶の味に密接な関係があるからです。環境破壊がすすんだ今日では、井戸や水道の水がますます、しかも汚染されています。お茶をたてるには水質が悪すぎます。

お茶の美味しさを求めるには、まざりものない純粋の水が一番です。不純物を含まない純粋の水を探していたところ、米國航空宇宙局の最先端技術により開発された逆浸透膜を使った、米國製アクアシン浄水器にめぐりあいました。味覚の優れた方はこの水を一口含んだだけでそのおいしさがわかります。美味しいお茶を嗜むため、お薦めします。

遠州茶道宗家十二世家元 小堀 宗慶

Dear Alfie:

I just received your Aquathin Newslite and had to drop you a short line.

My congratulations on your accomplishment in world trade export achievement and on your nomination to the Florida District Export Council! The U.S. Commerce Department couldn't have picked a better more qualified man! You deserve the honor, Alfie! My hat's off to you. And Kosher yet too! Is there no end to your achievement? I feel right proud of you and feel privileged to be numbered among your friends.

I know you will continue to take Aquathin to new heights in progress and development and garner more awards along the way. It is said that success is not a destination but a journey. You are certainly proving that statement to be true!

Best wishes for your continued success. Hello to Mitch and Debbie.

Fort Lauderdale, FL 33304-3036

Water, Water everywhere and ne'er a drop to drink. This lament by a shipwreck sailor on a barren island can be paraphrased here in South Florida to water, water everywhere and not a drop fit to drink. What is in our drinking water constitutes the problem.

Pharmaceutically pure water (no organic, inorganic, bacteria or radioactive elements present) is obtained from only three sources:

- 1. Distilled water by the triple steam process or evaporation*
- 2. De-ionization*
- 3. Reverse Osmosis*

No human can extract nourishment from inorganic minerals, nor can the human utilize inorganic minerals. Heavy metals, deadly to our health, such as; lead, aluminum, magnesium, iron, copper, manganese, chromium and potassium have been added to our local water supplies through industrial contamination and indifferent waste disposal. Inorganic salts and chemicals such as lime, calcium, sodium, chloride, carbonates, sulfates, nitrates as well as bacteria, are also an every day presence in our water supply.

What the human body cannot utilize or excrete, it must store. Consequently, the excessive inorganic salts and metals are stored and in time may take their toll in the form of Alzheimer Disease, hardening of the arteries, kidney stones, gall bladder problems, high blood pressure, heart disease and obesity.

We are all born with a certain amount of fat cells. The responsibility of the cells is to :

- 1. Store fat*
- 2. Store inorganic wastes that are not absorbed by our organs.*
- 3. Store additional water to keep wastes in solution.*
- 4. Pass inorganic wastes back into the body elimination cycle when the cells are bathed with no residue pure water.*

With pure water, the additional water retention requirement of the fat cell is reduced and it passes off the retained water and inorganic contaminants and therefore, a significant reduction in cell enlargement is achieved with a corresponding weight loss. When pure water enters the human body, it leaves no residue. It is free of all inorganic salts. It is the perfect drink for internal cleanliness.

Filtered water changes the color, taste and odor, if that is all you are interested in but it does not purify it. Some substances are stopped by the filter but salts, metals and bacteria are not. Usually, filtered water will show more to dissolved solids than our tap water unless the filter is changed very frequently. However, filtering does constitute one of the three major steps in processing water fit for human consumption. Reverse osmosis (RO) along with de-ionization (DI) water is crystal clear with every impurity removed. It is free of all inorganic salts, minerals, metals, material and bacteria. It will even remove radioactive material.

For freedom of degenerative diseases of circulation and elimination and better weight control, R.O. - D.I. water is the step to better health.

There are several ways to obtain this water, so please feel free to discuss this with me before you purchase any type of purification system.

RE: Aquathin Water Purification System

To Whom It May Concern:

Recently, the Special Immunology Unit at Imperial Point Medical Center installed a water purification system from the above company. The purpose of the installation of a special purification system was to have a system that would eliminate all pathogenic organisms that would cause harm to patients with a suppressed immune system. To date the system has worked very well and patients and staff have been extremely pleased with the quality and purity of the water obtained.

I highly recommend this system to be used to avoid infection by pathogenic organisms that can be eliminated from the water supply with an appropriate water purification system that removes very small microorganisms.

Sincerely yours,

Larry J. Wardzala, M.D., Ph.D.

Medical Director, Special Immunology Unit
Imperial Point Medical Center

AMERICAN
PHARMACEUTICAL SERVICES

January 4, 1999

Mr. Alfred J. Lipshultz
President/CEO
Aquathin Corporation

Dear Mr. Lipshultz,

I am writing this letter to express our satisfaction with Aquathin Products. Over the past two years, we have used your products for the use of our immune compromised clients. I want you to know that we feel there is a correlation on our client's improved morbidity and your product. This will be very hard to prove due to advances in medications. However, the use of medical grade water such as Aquathin Water Purification Systems is of vital importance to reduce exposure to water borne illnesses.

Product-wise we are pleased but more important is the service that goes along with the product. Your staff had consistently been very courteous and responsive to our special orders. The telephones had been answered very professionally each time and orders are delivered at the promised dates.

Please keep up the good work and on behalf of our clients and myself we wish to extend to you a very warm feeling of gratitude.

Sincerely,

Rolando G. Arcebedo RN, MBA/HA
Health Care Services Consultant

NEWLY RECEIVED INSERTION

September 28, 1999

Alfred J. Lipshultz, President
Aquathin Corporation
Aquathin Business Center
950 South Andrews Avenue
Pompano Beach, Florida 33069

Dear Sir:

My wife, Latrelle, and I first became acquainted with Aquathin Corporation after my transfer to the Philadelphia FBI Office years ago. We built a home across the Delaware River near Berlin, New Jersey, and due to the nuclear plants and other manufacturing plants in the area, we decided to invest in a water purification system that was second to none. We were fortunate to find an Aquathin representative actually residing in Berlin, New Jersey. During the time we lived in New Jersey (till December 1991), we were extremely pleased with your system. The purity and taste of the water was always excellent.

I was transferred to the Mobile Division in 1991 where we built a home in Monroe County, Alabama. We immediately contacted Aquathin Corporation and ordered a new purification system. We have never had a problem with either system we have owned. In our opinion, it is by far superior to all other purification systems on the market today. People who have visited our home and have tasted the water all comment on how great it taste.

We would highly recommend the Aquathin water purification system to anyone who is interested in their family getting great tasting fresh, clean, water.

Sincerely,

Bob & Latrelle Nettles

p.s. - Tell Allen that he may call me if he has any questions regarding the application process with the Bureau.

John C. Fimognari
Aquathin of Northeast Ohio
P.O. Box 223
Vienna, Ohio 44473

Dear John,

I would just like to express our satisfaction with you, your service, and your Aquathin line of water purification products.

Having known of the less than perfect quality of tap water we have been espousing the consumption of distilled water to our patients for many years. This, however, resulted in the need to go shopping for water and to physically haul it home. The alternative was expensive delivery of water from an outside source whose water purification system and standards were unknown. The ultimate in convenience and quality has been the purchase of your kitchen top model. When we consume the amount of water that we know we should we experience multiple benefits. We feel better and our weight goes down.

Please feel free to use this letter as a testimonial. Feel free to let your present and prospective customers know that we also have purchased your reverse osmosis system and water softening system for our self-serve car wash. Had the company and personnel that we purchased and maintained those systems through given us the service that you do we would not have had to replace them. But then we would not have your superior service now. Blessings in disguise!

We appreciate the timely service that you give to all of our units in the form of preventive maintenance rather than crisis intervention. This is what we recommend to our patients for their bodies, also. The next thing we want you to do is install a whole house system in our home. Thank you for your service and product.

Sincerely,

James G. Leone, D.C.

Jean-Marie DANZE

LICENCIÉ EN SCIENCES CHIMIQUES A.C.LG.

EX-ASSISTANT A L'UNIVERSITE DE LIEGE (PHARMACOGNOSIE)
CONSULTANT SCIENTIFIQUE ET TECHNIQUE EN BIOPHYSIQUE

To Mr. Alfred LIPSHULTZ
AQUATHIN
950 South Andrews Avenue
POMPANO BEACH
FL 33069 USA

Harzé, August 28th, 1995.

Dear Mr. LIPSHULTZ,

You probably know that I am consultant for energetic medicines (Homeopathy, MORA System of energetic healing, Pulsed Magnetic Fields therapy, Bioelectronic system from L.C. Vincent).

Today, we meet a lot of very ill patients who are mainly allergy patients and immune system disorders patients of all kinds (polyarthritis syndrome, a.i.d.s., chronic hepatic patients, hyper vaccinated patients a.s.o.).

The first problem we have to resolve consists in prescribing to these patients a healthy food to eat and a healthy water to drink.

We know today that when for instance, we want to cure allergy patients, we MUST get them out of allergenic substances. And for us we notice that the most allergenic substances are pesticides, many allopathic medications (bêta blocking molecules, antibiotics a.s.o.) and some metallic compounds (Nickel, Chromium, Beryllium ...).

I suppose you know that ATRAZINE and carbamate compounds are now present in all underground and lakes waters in farms countries (these compounds are HEAVY allergenic substances). For us, allergy from pollens, acarians, and graminæ flowers is a complete nonsense. People is living with acarians from the early times of his presence on earth and we can notice that the number of allergy patients is constantly growing from one year to the following one.

Heavy metals compounds like quicksilver organic molecules, lead, cadmium have an incidence on the immune system and depress it. They have a cumulative effect so that very low concentration of them in drinking water cannot be allowed for a.i.d.s. patients.

Alone reverse osmosis system combined with charcoal filter CANNOT remove the totality of pesticides and heavy metals from drinking water.

We absolutely need the post filtration with ACTIVE DEIONISATION RESINS cartridges. These cationic and anionic combined deionisation resins remove ALL traces of ionic pesticides and of metallic compounds (water obtained has a resistivity of more than 200.000 ohms x cm).

There is a luck in the fact that apart chlorinated organic non ionic compounds like DDT, LINDANE, CHLORDANE, ALDRIN ... (which are very large molecules, thus stopped by the R.O. membrane), all other pesticides molecules residues are of ionic structure and can be removed from water by the deionising cartridge.

These are the reasons why I immediately understood a few years ago that AQUATHIN system with charcoal prefilter, reverse osmosis unit and deionisation post filter was the ONLY system able to produce a healthy water.

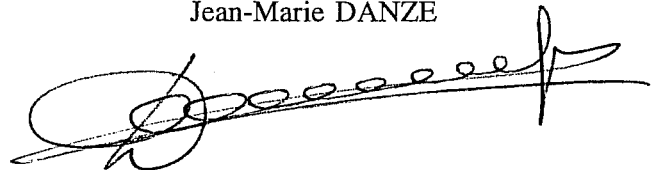

We can now also be sure that purified water from the KT90Y system is sterile.

So Y hope that you can now understand, Mr. Lipshultz, why all patients with heavy pathology cannot be cured without food coming from biological production and without Aquathin water. There is no hope without these two conditions !

In many patients, we must also insist on the fact that heavy metals are present in mouth (32 different metals in amalgams and dental alloys) and, when the MORA test of blocking with one of these metals is positive, we must remove the alloy from patient's mouth.

I am very pleased to write that to you, because I know that these informations can help a lot of ill people.

With my warmest regards
Jean-Marie DANZE

Re: Water Purification System

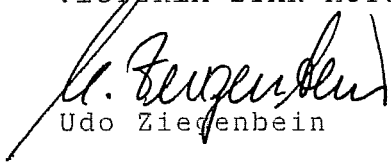

Dear Noel,

During times when the consumer is more critical toward service and value received than ever before, it is so unusual to get something positive to renew faith in what we are doing.

I have been thinking how effortless and smooth our car wash works today in comparison with the exchange bottle system we had before. Your system is doing everything you told us it would and better, it has not let us down once. Our new cars look like new because of the purity of water that your reverse osmosis system produces. I do believe your installation will serve our purpose for a long time to come and save us money as we anticipated.

Best Regards,

VICTORIA STAR MOTORS

Udo Ziegenbein

H. L. Boelens,
Hanssum 10,
6086 BV Neer N.L..

Beverwijk, 21 Augustus 1990.

Dear Mr. Boelens,

Following a short sequence of happenings :

-- Girl, aged 7 years, was born suffering from "SPINA BIFIDA"
Ever since her birth she has problems with her intestines,
constantly obstipated.
Their constipation was increasing and therefor she received
a medication.

Her daily dose was :

Bisacodyl, 2 times 5 mg.

Duphalac, increasing uptill 15 ml.

Oil of parafine, increasing uptill 20 ml.

November 1989 the situation got unbearable and it was decided to have
an operation done ; a colostoma was placed.

The dosage of drugs was decreased but still very necessary.

At the same time the intestines has to be rinsed two - three times daily
because of constipation.

During a holiday in Germany the condition of her intestines improved
remarkably.

REASON : Better quality of drinking water.

Ever since she is using drinking water treated by "AQUATHIN" water purification.

Her condition improved extremely !

She does not require any more drugs for her intestines.

Also rinsing is no longer required.

She is not on a diet any more.

Her urine is remarkably clear.

Her overall health condition is still increasing day after day.

Her meals and drinks are solely prepared by means of treated water.

With kind regards,

Ms. B. at Beverwijk.

Richard White
White Water Inc.
10845 N.E. 8th St. #203
Bellevue, WA 98004

Dear Richard;

I'm just writing to let you know how pleased I am with the Mega Char water filter you sold me for use in my brewpub.

Our water source is standard Seattle city water which is generally considered quite good other than the fact that it is fairly heavily chlorinated. The Mega Char filter is doing an excellent job of removing all traces of chlorine and any other off tastes or odors which might be present in the water. The water tastes great!

I bought the filter primarily for the water we use in our brewery since I wanted to use the purest water possible in our beer. However, the place where the effectiveness of the Mega Char filter is most noticeable is in the water we use for our ice machine and drinking water. After getting used to drinking our filtered water I find that the water at home and in other restaurants tastes like swimming pool water to me. I often tell customers that we have the best ice water in town and once they try a glass of it they can't help but agree.

The Mega Char was easy to install and has been completely trouble free in operation. I would heartily recommend it to anyone else considering a large capacity water filter.

Sincerely:

Reid Martin

CONGRATULATIONS AQUATHIN!

MOTE MARINE LABORATORY IS NOW USING AQUATHIN WATER.

TRI-COUNTY AQUATHIN has just completed a successful installation of a
AQUATHIN HIGH FLOW AQUALITE system.

On start-up, the unit worked perfectly!

We had some very serious "big time" competition with other
suppliers that want Mote Marine's business.

MOTE MARINE LABORATORY selected AQUATHIN because of:

Your skills in providing A HIGH QUALITY PRODUCT
Your commitment to us, an Authorized Dealer.

*AQUATHIN water will now be used in a laboratory to nurse sick fish
back to health and prevent "red tide" organisms from contaminating
MOTE MARINE display tanks.*

Thank you for helping us,our compliments for a job exceptionally well
done!

September 17, 1999

Dear David:

I wanted to take a minute to write to you and tell you how happy we are with our new *Aquathin Pure Water* products. Bobbi and I are not one of those who do product recommendations, but for these products I will make an exception.

As you are aware, it took almost two years before we made the decision to have you put in the *Aquathin Aqualite* Water Purification System. The last straw for us was the discovery of contamination in the water supply for Springfield, Illinois which caused people to become ill after swimming in the lake.

We have had the system for one year now, and I cannot begin to tell you how happy we are with the system and how disappointed I am that I did not get the system years ago! While we are secure in the knowledge that our water is safe to drink, we are delighted to find how good our water tastes. Coffee and tea have never been so good. Ice cubes are crystal clear. Interestingly enough, the calcium deposits on our *Bunn Coffee Maker* have disappeared with the use of pure water from *Aquathin*.

It was the success of this unit that determined for us that we should have a water softening system installed. After consulting with you, we decided on the *Aquathin SodaLite 2000* system which was installed September 3, 1999. While we have only observed the difference for only two weeks the improvements were obvious almost immediately.

First, we use less detergent in the laundry and dish washer and the cloths and dishes come out sparkling clean, without water spots on glasses and dishes. Second, bathroom fixtures and shower walls stay cleaner, longer without a lot of water spots left after use. Third, washing of my car and truck gives me superior results over untreated water. The water sheets off the vehicle with much less effort. Finally, skin condition has improved with treated water. We use less soap and I get a much more comfortable shave.

It should be obvious that we are pleased with the addition of our *Aquathin* products. In addition, we were very pleased with your professional presentation and your willingness to see the products were properly installed. You followed up with the installation checking with us to see that we were pleased with the results. At no time did we feel pressured to purchase. You were interested in customer service, not just another sale, and we appreciate it. Thank you, David. You may be assured that we will recommend *Aquathin* products, but we will praise your professionalism.

Robert Wiley
Springfield, Illinois

Subject: Re: Pure Water

Dear Alfie

Thank you for your quick response to my email. Please be advised that I obtained my Aquathin system from Mr Jan Duvehage in February 1998, and since then have been bottling water.

I must however tell you how drinking Pure Water has changed my son's life.

My son Daniel is now 11 years old and has been a chronic asthmatic since he was 4 days old. He was a bottle fed baby. This child was more in hospital than he was at home, wherever we went a nebulizer or oxygen cylinder was taken with us. He couldn't play any form of sport, he couldn't laugh to much as this induced an asthma attack. We took him to Europe to South Africa and of course to doctors in Zimbabwe, we tried alternative medicine, nothing worked. So in September 1997, I meet Jan Duvehage and bought a traveller kit from him, in order to do some of my own tests on the water and whether there was a market. Whilst I was conducting all my tests and market research, we at home were drinking Pure Water. In December of that year my husband asked if I had noticed that Daniel had not had an asthma attack in quite a while. I duly checked my diary and found that the last time Daniel had had an asthma attack had been on the 31st August 1997. I never associated the Pure Water with his asthma until when in February 1999 I was on the internet and there was a banner displayed across the page saying that it had been medically proven that Chlorine in water causes asthma attacks, well with the removal of the chlorine Daniel's attacks stopped and the only time he has a little bit of tightness of the chest these days is if he swims too much. He will not drink any other water and with just cause.

Regards and best wishes

To Whom It May Concern:

We have an osmoses water filter system installed by Mr. Preston's Aquathin Heartland Company. This is one of the most profitable moves we have made in regards to our restaurant business. The difference this system has made in our drinking water, tea and coffee is astronomical.

Mr. Preston takes pride in his workmanship. His customers mean a lot to him and when we have a problem, one phone call is all it takes. If he can't walk us through the problem over the phone, then he's on his way over here. In our opinion, you can't go wrong with this company or this system. Both are very compatible with small businesses like ours.

Thank you,

Virginia Cassell/Secretary

Dear Alfie,

I have been in the plumbing business for twenty eight years. When I decided to enter the water treatment line I searched different companies for about two years until I found Aquathin. Not knowing anything about water filtration equipment I knew I needed a company that would give me training and technical assistance.

Let me take the time to thank each and everone of you at Aquathin. Debbie is usually the first person I speak with. She is always pleasant and helpful. At first I thought either I was your only dealer in the world or you had caller ID. She always recognized my voice. Then she reminded me I was from South Lousiana. I still don't think I have an accent. Thank you, Debbie.

I don't have much occasion to speak with Matt, but when I do he is always

2/18/2002

eager to do anything to help me with my question or problem. When I needed to email the logo for business cards it was done in a very timely manner.

Thank you, Matt

Mitch was the first Aquathin person I met. People say the first impression is very important. I can understand that Mitch is the real glue that holds everything together. From the first time I met him I could sense his wisdom. Thank you, Mitch.

I can also tell the people in shipping must be very dedicated employees. I receive my orders in a timely manner and in great condition due to the care with which the products are packed. The quality control personnel pay careful attention to their job witnessed by the fact that all products have been tested and proven to be ready for installation. Thanks to all you people.

Alfie, I still think if all your dealers call you half as much as I do, you must stay on the phone all day long. It is so reassuring to know that if I have a question or a problem you are as close as the phone. There is no job I would be hesitant to tackle due to the fact that I know I have the best product, but most importantly the best company in my corner. Thank you, Alfie.

In closing, let say that if you have anyone who is considering an Aquathin Dealership, please give him my name and phone number for a reference. If they call me you can be sure their sold on Aquathin.

Yours truly,

Bergis Smith

Thank you for your email and warm comments regarding our mutual cooperation concerning this highly specialized custom installation for the U.S. Embassy in Costa Rica. Congratulations on a job well done. I have copied your message per your instructions to the Global Authorized Aquathin Dealer Network. As well, with your permission, I would like to refer any Dealer to you who encounters the same RFQ scenario for a quick course at "COFASC'S AQUATHIN UNIVERSITY"!

Thank you for your email...and a very nice way to start the weekend. I trust you received the Embassy's final payment !!!

Warmest regards to all,

Alfie

Subject: U.S. Embassy water purification system

Dear Alfred:

I'm pleased to inform you that today we finished the installation of the water purification system at the US Embassy in San Jose, Costa Rica, consisting of the following equipment supplied by AQUATHIN:

Two sets of stainless steel 50-10 micron sediment prefilters + flow meter with programmable divider + calcium hypochlorite feed pump + calcium hypochlorite tank agitator + zinc orthophosphate feed pump + static mixer.

US Embassy personnel was pretty excited about the job done and they took a water sample for pre-testing. Calcium hypochlorite was set to 1 ppm and zinc orthophosphate was set to 5 ppm. If the result of the test is good, their water cisterns main valve will be opened and will have treated water on the embassy building. Later adjustments will be done according to chlorine samples taken from different faucets on the building.

I want to thank you for all the prompt assistance you gave to us in all the steps involved with this installation. Also, please extend our thanks to the OEM technicians who gave us the necessary information on the equipments and chemicals.

Please be sure to re-send this email to all the Aquathin dealers worldwide.

I'll contact you next week for water test results.

Best Regards,

Eric

TO WHOM IT MAY CONCERN,

RECENTLY, AQUA-THIN REPLACED A WATER SOFTNER

AT A MCDONALD'S I OWN IT TEXAS. BOB PRESTON,

THE AQUA-THIN REPRESENTATIVE, WAS MOST ACOM-

MADATING AND PROVIDED GREAT SERVICE ALONG

WITH WHAT I CONSIDER GREAT QUALITY EQUIPMENT

AND SERVICE.

THE EXPERIENCE WITH AQUA-THIN THUS FAR IS SUPER-

IOR TO OTHER PROVIDERS I'VE DEALT WITH.

SINCERELY,

NORM WEBER
