**Subject:** FORUM Q & A: IMPORTANT BISPHENOL-A UPDATE!

*Dear Aquathin Dealer OnLine, Splash NewsBulletin and Allergic Reaction NewsBulletin Members;*

*Over the past year, I have responded individually and in Forum Q&A's concerning polycarbonates. I am pleased to forward the conclusive report below from the IBWA of which Aquathin maintains membership, for your review.*

*Lastly, and as an ongoing commitment for 28 years now...Aquathin heavily researches each and every raw material and component including that producer's traceability, certifications and reputation...and only after 6 months to 1 year of field test, will we feel comfortable with utilizing. In water purification, the name of the game is "take it out"...not "leach it in".*

*I LOVE MY AQUATHIN ! AND REMEMBER, THE NEXT BEST THING TO OWNING AN AQUATHIN IS RECOMMENDING ONE TO A FRIEND !!*

*Let me know what you AquathinK !*

*Warmest regards to all...as well, your comments are always welcome and very much appreciated.*

**FOR THE BEST TASTE IN LIFE &**

**28 Years Pure Excellence**

**...and another Quarter Century re-inventing the water industry !**

**Think Aquathin...AquathinK !**

**Subject:** IMPORTANT BISPHENOL-A UPDATE!

## Bisphenol-A Update

On June 11, 2008, Europe's Association of Plastics Manufacturers, known as PlasticsEurope, released a report on the findings of the European Commission's updated BPA risk assessment. The PlasticsEurope report stated that:

***"In its updated risk assessment report of Bisphenol A (BPA) published today the European Commission concluded that products made from BPA, such as polycarbonate and epoxy resins, are safe for consumers and the environment when used as intended. This conclusion reconfirms the findings of the 2003 European risk assessment of BPA, and is consistent with conclusions of the scientific assessments of other regulatory bodies including the US FDA, the Japanese authorities and the European Food Safety Authority (EFSA)."***

For a copy of the entire PlasticsEurope report, [\[CLICK HERE\]](#).

We expect Health Canada and the U.S. Food and Drug Administration to issue their revised findings in the near future. We will report on those findings when they become available.

-Bob Hirst, IBWA
