**Subject:** TECH BANK: \*\*CHICKEN FARM RAISING POULTRY THAT WOULD NOT GAIN WEIGHT\*\*

Dear Aquathin Dealer OnLine;

All Aquathin Dealers report great installation sales and installation success stories in companies like Shell, Texaco, Starbucks...great establishments including the Smithsonian Institute and Embassies...really heartwarming stories including AIDS, HIV patients, autistic children and chemically sensitive people doing better because of Aquathin...and many celebrity Customers all over the world. I like to publish these for you, all of which appear in your Aquathin Master Catalogue...and here is a very recent accolade for your scorecard !

My long time friends and Authorized Aquathin Dealers, Noel Douglas of AquaScience in Kitchener Ontario and Gordon Bastiaans of Aquathin South Africa have installed water purification systems for chickens to consume from. Noel has installed an Aquathin 600+24K for a medium sized quasi experimental farm raising chickens on total organic meal, purified water, clean air. Gordon has installed an Aquathin 12,000+24K PPVM on a very large chicken "ranch"...both reported tremendous "and profitable" results for the farm owners. Start your read at the bottom of this email and head north ! I respectfully recommend that all Aquathin Dealers located within walking distance of chicken farms, take this email and make presentations to this industry...they need you...AND NO ONE DOES IT BETTER !

I, AND THE BIRDS, LOVE OUR AQUATHIN !!!

Warmest regards to all...as well, your comments are always welcome and very much appreciated.

FOR THE BEST TASTE IN LIFE &

**25 Years Pure Excellence**

Think Aquathin...AquathinK !!

Dear Alfie

We will be very happy to contribute through the use of this successful installation - it may just prove to be of use to someone else with a similar problem.

Just to paint the picture correctly - please note that the first problem noticed was that the chickens did not eat properly and were therefore under weight. Further investigation revealed that they were not eating sufficiently because they were not drinking the borehole water readily. The local vet recommended the use of RO water after seeing the analysis which indicated very hard water and dangerously high nitrate content.

With best regards

Gordon

Dear Noel

We have good news - our customer has confirmed that the weight of the chickens at the end of the 30 day period has increased by 20% and is now running at industry norms. She is therefore very happy as her profit margins have been restored. In summary we supplied a 45 000 litre per day PPVM system preceded by Synchronatic softener and Megachar. The RO water passes through a UV lamp as it leaves the storage tank.

Thank you for your various recommendations and advice . We really do appreciate your input and the information you gave has certainly been valued and will be used again in future I am sure.

If you ever visit South Africa, please do call on us, and we will take you to the chicken farm on a visit.

With best regards

Gordon Bastiaans

Dear Noel

We finally have the PPVM RO System up and running. The customer advised us that within the same week the chickens water intake had increased substantially up to "normal volumes". We had not yet come back to you as we were waiting to see whether there was a commensurate weight gain at the end of the 30 day period. We will keep you posted.

So far the signs are good and the customer is happy and very optimistic.

Thank you for your support and your continued interest in our problem.

With kind regards

Gordon

Dear Noel

Thank you for your e-mail.

We are installing a full RO System including softener and megachar for this chicken farmer during this coming week. We will keep you posted as to results. She will certainly have some of the purest water in South Africa and will definitely not be able to suspect that her water is causing the problems identified!!!

Let us hope that the expense that she has gone to brings positive results as everything else she has tried has had no positive effect.

Many thanks for your ongoing interest

With kind regards

Gordon

Hello Gordon:

I was just going through some older correspondence and came across your "E" mails regarding the lady with the birds that were not gaining any weight to speak of. What has happened there?  
Have you got the problem narrowed down so that you can see an improvement in the birds performance?

Noel Douglas
