Subject: SCALE AND FILM IN PIPING CAN ACCUMULATE AND LEACH EXCESSIVE CONCENTRATIONS OF CONTAMINATES

Dear Aquathin Dealer OnLine;

EPA REPORT - LEACHING.pdf

I have sent you numerous bulletins for industry updates...none more cogent than the awakening (at the government level) attached herewith.

*Note portions of the EPA report's heavy commentary i.e. **"that this is a largely unknown, unexplored, and universal phenomenon", "well above levels considered safe for consumption", "household plumbing...making those deposits by definition, hazardous waste", chloramine...autodestruction into nitrates"**.*

We have understood what you are about to read for many years, based upon our global field experiences, and teach such at Aquathin University...for Customers to make educated decisions for demanding enhanced home water security. I would respectfully recommend that you promptly review the attached report with your Sales and Tech Team.

I love my Aquathin !

Warmest regards to all...as well, your comments are always welcome and very much appreciated.

FOR THE BEST TASTE IN LIFE &

25 Years Pure Excellence

Think Aquathin...AquathinK !!
