Subject: HEY WHAT'S THAT SWIMMING NEXT TO YOU !?!?!?!?

Dear Aquathin Dealer;

Recently I emailed you an article discussing paying Californian's \$1000 to drink poison for their part in a test. Here is an article that goes into the same "can you believe how stupid this world is getting" category ! I am sure that after you read it you may not look forward to ever going to the beach again. Fortunately, the last line of the article is the silver lining.

FOR THE BEST TASTE IN LIFE

Think Aquathin..AquathinK !!

Celebrating our 20th birthday in 2000 !!!

(visit the allnew <http://www.aquathin.com>)

## US law would allow treated boat sewage discharge

United States  
Washington, D.C.

New Jersey Congressman James Saxton has introduced the Recreational Waters Protection Act bill (HR 4917) which would change national Marine Sanitation Device (MSD) standards, allowing the use of onboard sewage treatment systems in waters that are now US Environmental Protection Agency (EPA)-designated "no-discharge zones."

The proposed act would do three things: direct the EPA to review the capabilities of existing marine sanitation technology and publish revised standards for MSDs; provide that the standards require a

baseline effluent water quality of not more than 10 fecal coliform per 100 milliliters; and amend the law so that states cannot prohibit the discharge of sewage (whether treated or not) for vessels that operate a type I or II MSD that meets the revised standards of the Recreational Waters Protection Act.

Saxton is chairman of the House Fisheries, Conservation, Wildlife and Oceans subcommittee. **It appears, thus far, he has not found any Congressional co-sponsors.**
