Subject: TELEVISION SPECIAL ABOUT WATERSHEDS AND RUNOFF

Dear Aquathin Dealer OnLine, Splash NewsBulletin and Allergic Reaction NewsBulletin Members;

**A most informative Television Special about Watersheds
to Air on The Weather Channel June
26, 2004**

The new ½ hour television special about watersheds, co-produced by the Environmental Protection Agency and The Weather Channel, will air again on The Weather Channel on Saturday, June 26, at 8:30 PM and 11:30 PM EST. After the Storm premiered on The Weather Channel February. Additional showings are scheduled for Saturday, September 18 at 8 PM and 11:00 PM EST.

Several of our recent Splash NewsBulletins discussed the most devastating form of water pollution is runoff, because it is a collection of all forms of pollution creating a massive chemical soup. I invite you to visit the EPA Web site at <http://www.epa.gov/weatherchannel/> for more information, including a free downloadable brochure about stormwater pollution. This is an excellent colored presentation that you can use in your educational seminars and training.

Incidentally that chemical soup...nothing passes your Patented Aquathin RODI Process.

(all together now) " I LOVE MY AQUATHIN ! "

Warmest regards to all...as well, your comments are always welcome and very much appreciated.

FOR THE BEST TASTE IN LIFE &

25 Years Pure Excellence

Think Aquathin...AquathinK !!
