Over the last several years, our industry has been introduced to various models of "leak detectors"...many of which are no longer on the market due to failure to detect, false alarms, difficult to install on water lines, expensive or too cheaply made...low volume.

And all were directed for under sink locations. Insurance industry reports(1) that while weather related claims are most common, fire causes the most expensive claims, accounting for nearly one quarter of the total claim costs. Fires are often caused by appliance and machinery misuse or failure, electrical problems, including wiring or outlet issues, and cooking. Typically two main causes of water damage — weather events, such as rain or snow melt, and other issues, such as pipes bursting or leaking, joints, sewer or sump pump backups or appliance leaks (hot water tanks, washing machines) followed fire as the most expensive claims.

The same company that for the past 30+ years, has provided Aquathin our relays for your Commercial RODI Systems has introduced...

WATER GUARD...small, compact, yet robust and inexpensive.

□ DESIGNED TO FOCUS ON "ALL WATER SENSITIVE AREAS" OF YOUR HOME OR BUSINESS.

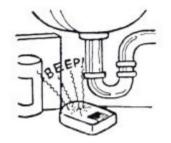

Simply install a 9 volt battery and lay it down!!!

Providing continuous, 24 hour protection against water damage, the Water Guard is compact and easy to use. Just place the WG1 near your water sensitive areas and it will sound a 90 dB alarm when water is present.

## **Features / Benefits**

- Responds to direct contact with water
- Powerful 90 dB audible alarm
- Compact design, small enough to place behind appliances
- Floating case
- Continuous alarm up to 72 hours
- Low batter indicator
- Powered by 9 V battery (not included) no 110v or 220v plug-ins
- Dimensions: 2 1/4" X 4" X 1 1/4"
- Weight: 3 ozs.
- 90 day Warranty
- **Applications**
- Sump Pumps Near Plumbing
- Water Heaters Dishwashers
- Closets Under Water Beds
- Garage Computer Rooms
- Under Sinks Kitchens
- Washing Machines Toilets
- Bathrooms Basements
- Near Fish Tanks
